

Hello! I'm Rhaine Gardner. I grew up in Littleton, Colorado but have gotten to experience life in different parts of the USA including Indiana, Virginia, and Idaho. I received my Bachelors from Brigham Young University- Idaho in Marriage and Family with intentions to be a marriage and family therapist. A few months into graduate school for therapy, I discovered that I loved education and wanted to help students build confidence and find a love for math. I went back to school to get my teaching license for secondary math. In my free time I really enjoy reading fantasy, cooking, and spending time with my family. I love traveling around the world to experience new cultures, food, and different landscapes.

Algebra 2 Required Materials:

- Either a folder or binder for math (whatever is preferred)
- Notebook for math only (college ruled)
- Graph paper
- Pencil and eraser
- Colored pencils or colored pens
- Personal dry- erase makers
- Calculator

Algebra 2 Optional Donations:

- Tissues
- Disinfecting Wipes
- Ream of copy paper
- Dry erase markers (any color or variety)

Calculators: A calculator will help you be successful throughout your entire High School career in subjects beyond Math. A graphing calculator is a good option but can be expensive. A scientific calculator can be an excellent second option. We will also be using DESMOS (online calculators). Below are my recommendations:

Graphing Calculator:

TI -84 PLUS

Scientific Calculators:

Casio – fx-115ES PLUS TI – 30X - IIS
